**THE SURGERY CENTER AT MIDLANDS ORTHOPAEDICS & NEUROSURGERY
HIGHLIGHTS POTENTIAL BENEFITS OF ROSA[®] KNEE SYSTEM
FOR TOTAL KNEE REPLACEMENT**

Columbia, SC - 9-3-20 -- Total joint replacement is one of the most commonly performed, elective surgical procedures in the United States.¹ It is also becoming an increasingly popular outpatient procedure at surgery centers across the country, including The Surgery Center at Midlands Orthopaedics & Neurosurgery in Columbia, South Carolina.

Orthopedic surgeons and the medical staff at The Surgery Center at Midlands Orthopaedics & Neurosurgery are excited to offer Zimmer Biomet's ROSA[®] Knee System, which brings together robotic technology with industry-leading knee implants to help surgeons personalize surgical procedures for their patients. ROSA Knee is a robotically-assisted surgical system designed to help perform total knee replacement surgery. It includes features to assist with bone resections and assessing the state of soft tissues in order to facilitate implant positioning intraoperatively. Data provided by ROSA Knee assists with complex decision-making and enables surgeons to use computer and software technology to control and move surgical instruments, allowing for greater precision and flexibility during procedures.

"We're proud to be the first in South Carolina to offer this technology. For everyone involved – surgeons, medical staff, and most importantly patients – ROSA Knee has the potential to offer a number of key benefits and advantages," said Janet Carlson, The Surgery Center at Midlands Orthopaedics & Neurosurgery's Chief Executive Officer. "We know the decision to have joint replacement is often a difficult one for patients to make, and we believe these robotically-assisted technologies have the potential to make it an easier one moving forward."

For more information on how patients may benefit from using ROSA Knee for total knee replacement, contact Janet Carlson at Janet.Carlson@scasurgery.com or [\(803\) 461-4740](tel:8034614740).

About The Surgery Center at Midlands Orthopaedics & Neurosurgery

The Surgery Center at Midlands Orthopaedics & Neurosurgery is a freestanding ambulatory surgery center providing a full spectrum of care. Together with Surgical Care Affiliates (SCA), their vision is to be the practice of choice for outpatient spine and orthopaedic procedures.

Experienced physicians, nurses, and technicians use advanced technology and equipment to provide high quality, care in a warm, personalized setting.

The Surgery Center at Midlands Orthopaedics & Neurosurgery is accredited by the Accreditation Association for Ambulatory Health Care (AAAHC), and strives to provide the best care possible by meeting and exceeding AAAHC standards for high-quality healthcare.
